OSTARA ADVISORS

April 2024

Investment Banking Associate role at Ostara Advisors

Quick Intro: Founded in 2015, Ostara Advisors is India's first specialist investment banking firm focused on Electric Mobility and Climate-tech, providing **growth capital raising and M&A solutions**. Taking a thought-leadership based approach in these sectors, the firm is an early mover in institutionalizing fund-raising for the Indian Mobility & Sustainability ecosystem, having successfully closed marquee M&A and fund-raise deals including India's first Electric Vehicle two-wheeler M&A transaction advising Greaves Cotton Limited's on their acquisition of pioneering EV two-wheeler company, Ampere Vehicles, as well as one of the largest growth capital rounds in the EV three-wheeler space, to name a few. The firm was founded by Ms. Vasudha Madhavan, who is one of the first investment bankers in India to specialize in Electric Mobility. She has over 21 years of experience in Corporate and Investment Banking and was featured in the Top 20 on the All-India M&A League Tables by Venture Intelligence in late-2018. In 2023, Vasudha was felicitated by India Energy Storage Alliance (IESA) as one of the "Women leaders driving energy sector in India". More on our website.

The Role: We are hiring for a full-time Investment Banking Associate role, to share our growth journey as the pre-eminent Climate-tech investment bank in India.

Key Responsibilities

As Investment Banking Associate at Ostara, you will work directly with the Founder and Senior Bankers in the following areas:

- Supporting Senior Deal Team in end-to-end Investor Outreach, Deal execution, preparation of deal collateral including financial models, valuation frameworks, information memoranda and due diligence coordination, as required. We work on deal sizes in the range of $5-50 million, which are typically Series A, B and later stages.
- Active role in building **India's best global investor network for Mobility and Climate-tech** businesses + regular engagement with global investors. We already engage with over 200+ Global Climate Investors.
- Business Development in our focus sectors and preparing Pitches for new mandates in terms on information collation, peer group analysis, research, preparation of pitch presentations, etc.
- Research on Industry structure and size, Valuation comparables, Market Mapping in our focus sectors and sub-sectors *(pls check Focus Areas on this page)* and relevant information on companies, investors and portfolio companies from databases like Tracxn, Venture Intelligence etc.

What we look for:

1. Strong understanding of corporate finance, financial modeling & ratios as well as effective design and communication skills using powerpoint slides
2. Highly disciplined, strong work ethic, ability to work hard, sometimes for long hours, and deliver on timelines
3. Analytically strong, bright, smart with good communication skills, level-headed, highly entrepreneurial
4. Interest in Electric Mobility and Emerging areas in Climate-tech and keenness to learn. Should be curious and interested to do deep-dives into technical subjects
5. Educational Qualifications: Bachelors or Masters or PG degrees in Management/Finance, with 2-4 years' experience in finance (relevant experience in corporate finance / investment banking preferred)

Before we forget:

- We are geeky when it comes to all things EV. Don't forget to read our newsletter, before you decide to apply.
- We love to empower each other and grow as a team. So, extra points for thinking creatively, being curious and taking the lead.
